

'Ear Muff' for Freedom Helmet

General Description:

'Saviour' Helmets are used widely in the Industry Both for Indoor and Outdoor applications. Many a times protection is required simultaneously for protection against High pitch Noise.

This is required mostly in Mechanical Workshops, Running Plants, manufacturing Industry or operations leading to high noise by running machines and Equipment. 'Saviour' Freedom Helmet mounted Earmuffs are the answer to such protection requirements.

MODEL NO:

HPSAV-EF

Specifications

'Saviour' Helmet Mounted Earmuffs are very easily attached with 'Saviour' Freedom Helmet as well as any Helmet with Universal Slot. Light in weight, its caps are made from hard ABS thermo engineering plastic material to reduce noise. The cushions are made from very soft PVC to extend comfort to wearer.

'Saviour' Helmet Mounted Earmuffs reduce the noise frequency up to 26 DB NRR.

Applications

- ◆ Running Plants generating High Noise due to Machinery / Equipment or Crackling effect of operations.
- ◆ Refineries / Fertilizers etc. using heavy Process equipment and operations.
- ◆ Workshops inducing machinery noise in operations like grinding etc.
- ◆ Mechanical fabrication works employing hammering and structural clashing.

Advantage

- ◆ Earmuffs attachment is durable, lightweight with soft, wide cushions to provide optimum comfort.
- ◆ Fits Helmet with side slots without disturbing Face Shield arrangement.
- ◆ Special shaped acoustic cup type absorbers effectively block harmful noise. Perfect sound attenuation to filter high noise.
- ◆ Evades use of multiple PPE as single unit is used for compactness.
- ◆ Soft padded cushions for comfort.

Certification

- ◆ **EN 352-3:2001 compliant**
