SAVIOUR FOLDABLE EARMUFF

Model No.: EPSAV-108

Saviour Foldable Earmuff

Saviour Earmuffs sound like a smart solution for those working in noisy environments like mechanical workshops or manufacturing plants. It's essential to protect workers' hearing from high-pitched noise generated by running machines and equipment. Earmuffs can provide effective protection by reducing the level of noise reaching the ears, helping to prevent hearing damage and ensure a safer working environment.

TECHNICAL SPECIFICATIONS

Material	Polypropylene
Construction	<ul style="list-style-type: none">• Compact foldable ear cups with soft cushion• Adjustable headband to suit various head shapes and sizes.
Noise limit	Up to 100 dB

APPLICATIONS

1. Running plants where machinery and equipment generate high levels of noise, or where operations produce a crackling effect.
2. Refineries, fertilizer plants, and similar facilities utilizing heavy process equipment during operations.
3. Workshops involved in activities like grinding, resulting in machinery noise.
4. Mechanical fabrication works, including tasks such as hammering and structural impact, which contribute to noise levels.

KEY HIGHLIGHTS

1. Durable, lightweight and comfortable with soft cushions.
2. Universally fitting all head and ear shapes/sizes.
3. Foldable for easy portability.
4. Effective noise blocking and attenuation.
5. Soft padding for comfort.
6. Protection against hearing loss and reduced sound exposure.
7. It comes with a flexible storage pouch which can be attached to a waist belt for easy access.

CERTIFICATION

- Tested as per EN 352-2

Belt Mounted Pouch
