Complete Safety Solutions!

### General Description:

Protection of the Feet is a must at all manufacturing facilities as all kinds of materials are stored or strewn in the vicinity. Besides this there is always a fear of accidental bumping with the unknown while walking or climbing or during process operations or tripping because of oil, water or loose earth or wet work surfaces.

'SAVIOUR' offer a variety of Shoes to meet such eventualities by a combination of Uppers with protected Toes and Soles which take care of such dangers.

Being Light in weight and comfortable they reduce fatigue to avoid concentration at work. These Trendy shoes come with rust free Brass eyelets and Cotton laces for good knotting grip.

### Specifications:

'Saviour' Sports Shoes are a Double density PU Sole Shoes with 200J Steel Toe which offer protection against heavy objects falling on to the Toe. They are made from Soft yet sturdy leather upper with Double Density PU Sole. PU sole offers protection against oil and mild acid spills and provides comfort during long standing or use. These are light weight shoes which provide optimum safety and comfort by reducing the loss of concentration due to fatigue at work floor. Sharp Print Pattern gives sophisticated look and prevents dirt accumulation in Printed area due to lesser depth of Print. Separate Heel grip made of Suede leather for Superior Gripping at the heel portion. Provided with tough Eyelet gives Trendy Look and are Rust Free. Cotton Lace gives good grip on knotting.

Available in Sizes 5-11 and colour is Bluish Grey.

### Certifications

- ✓ Compliance: IS-15298-Part-II

### Applications:

- ✓ Breathable leather upper with inside lining.
- ✓ Steel Toe as per IS-15298 with high impact resistance up to 200 joules.
- ✓ Double Density PU light weight sole with special sole design for added grip.
- ✓ Rust free eyelets
- ✓ Cotton Laces for knotting grip.

### Instructions of Use:

Saviour shoes are designed for specific conditions. Use your shoes only in the conditions which they are intended for. Safety shoes are often warmer than 'normal' shoes. The steel toecap does not ventilate, and the leather of the upper is thicker than the normal shoes. Wash your feet regularly after work, and dry them thoroughly, particularly between the toes. Wear clean and good socks every day. The use of talcum powder and daily swapping insoles helps keep your feet extra dry. Socks and shoes form a single unit that takes care of optimal moisture transfer, and dry, comfortable feet.

### Cleaning & Maintenance:

- ✓ Wipe off the dust with a soft cloth/brush before polishing.
- ✓ Never wear shoes with laces tied on.
- ✓ Let the sock dry, before it is kept in cupboard.
- ✓ Clean in-between the cleats of the sole with hard brush regularly.
