Saviour Dual Density 'High Ankle' Shoes

The 'Saviour' High Ankle Dual Density PU Sole Safety Shoes feature a construction using full leather, boasting a thickness ranging from 1.8 to 2.1 mm. Equipped with a steel toe, these shoes offer both impact resistance and compression resistance of up to 15KN. Their ergonomically compact design ensures wearer comfort and mitigates fatigue, even during prolonged use. The soft, padded tongue enhances comfort, while the heel counter provides abrasion resistance. Additionally, they feature a sweat-absorbing liner with a soft cushioned insole for added comfort.
