Saviour Heatstar Aluminized Aramid Gloves

The Saviour Heatstar Aluminized Aramid Gloves is a specialized type of protective glove designed to provide heat resistance and reflectivity, commonly used in applications where there is a risk of exposure to high temperatures and radiant heat. These gloves are often employed in industries such as welding, foundries, glass manufacturing, and other high-temperature environments.

TECHNICAL SPECIFICATIONS

Outer layer	Para-aramid felt on palm, aluminium foil on back and cuff
Inner Layer	100% cotton
Colour	Yellow and glossy aluminium
Length	355 mm

CERTIFICATION

EN 407

4444XX

KEY HIGHLIGHTS

- 1. Light weight
- 2. Aramid grip
- 3. Cut and abrasion resistant
- 4. High tensile strength

APPLICATIONS

- 1. Industry welding
- 2. Industry bakery oven
- 3. Metal Extrusion
- 4. Metal Casting
- 5. Metal Smelting
- 6. Other high temperature working environment.
