Saviour Corded Foam Earplugs

In every manufacturing facility, noise is inevitable, and its intensity can differ based on the operations. To safeguard against high-pitched noise, especially in mechanical workshops, running plants, and manufacturing industries where machines and equipment generate significant noise, protection is essential. Introducing 'Saviour' corded foam earplugs, the solution to meet such protection needs.

TECHNICAL SPECIFICATIONS

1. Soft and comfort molding to the individual shape of each ear for superior hearing protection.
2. Designed with a cord for convenience and to prevent loss
3. Ideal for moderate to high noise environments (up to 100 dBA TWA), boasting a Noise Reduction Rating (NRR) of 29 dB.
4. Tapered shape crafted to fit most ear canals, while the soft hypoallergenic foam ensures a personalized seal for optimal performance.

KEY HIGHLIGHTS

1. Guards against hearing loss and minimizes sound vibration through the cord.
2. Washable and reusable, providing economic benefits.
3. Optional storage case ensures cleanliness and protection for earplugs.
4. Features an anti-vibrating cord for added comfort.
5. Offered in various colors, including Blue and Orange.
6. Provides a Sound Noise Ratio (SNR) / Noise Reduction Rating (NRR) of 29 dB.

APPLICATIONS

1. Industrial plants with machinery and equipment producing high levels of noise.
2. Refineries and fertilizer facilities utilizing heavy process equipment.
3. Workshops engaged in noisy operations such as grinding.
4. Mechanical heavy fabrication sites involving hammering and structural impact noise.

CERTIFICATION

- Tested as per EN 352-2
