Saviour Impact Safe Gloves

The Saviour Impact Safe glove is designed for the toughest oilfield jobs, such as rig floors, rig services, and hydraulic fracking.

It has advanced impact protection on the back of the hand and special grip pads on the palm to improve grip in critical areas. It also has a water-resistant layer to protect hands from fluids in upstream operations.

These gloves provide excellent grip in oily, dry, and wet situations, as well as vibration protection, cut resistance, and abrasion resistance. They also prevent oil and water from soaking through.

TECHNICAL SPECIFICATIONS

Construction	Cut & sewn
Liner Material	HPPE Polyester
Coating material	Nitrile, thermoplastic rubber
Cuff Style:	Knit Wrist
