Saviour Cut-5 Gloves

These gloves offer excellent dexterity and flexibility for handling various tasks. They have superior cut protection and abrasion resistance to prevent injuries and extend durability. They also have a strong grip in dry conditions for better control and precision. The palm dipping provides better oil protection than knitted or cut and sew gloves, making them suitable for oily environments. These gloves are a cost-effective solution for medium-weight applications that require both protection and performance.

TECHNICAL SPECIFICATIONS

Construction	Knitted
Coating Material	Nitrile
Liner Material	HPPE, Nylon, Spandex, Glass Fiber
Cuff Style	Elasticized Knitted wrist
Gauge	13
EN Size	7,8,9,10
