

SAVIOUR SAFETY NET(DOUBLE LAYER)

Model No.: FPSAV-SND

Saviour Safety Net (Double Layer)

Primary function is to provide passive fall protection by catching falling people or objects, reducing injuries from falls. They also serve to prevent objects from falling onto lower levels, protect against unauthorized entry, and enhance worker confidence by providing peace of mind.

TECHNICAL SPECIFICATION

Border Rope	12 mm diameter PP (Polypropylene) Rope (ISI marked) Breaking strength 25.4 kN
1st Layer	2.5 mm diameter Braided Rope with mesh size 30 mm × 30 mm with breaking strength 843 N
2nd Layer	80 GSM Monofilament Net. Monofilament UV stabilized Net with Welding/Grinding Splatter Resistant
Fabrication Type	Machine Knotted
Tie Rope & Tie Cord	12 mm diameter 1.5 m long tie cord at 4 corners, 1 meter long at every 1 mtr gap and 1.5 mtr with thimble spliced for easy hook anchorage
Standard Size	Customizable
Marking/Label	Manufacture brand name/Logo, Model No., Batch No., Size, ISI mark with license No.

KEY FEATURES

- Made of high tensile strength and good weather resistance material.
- Available in customizable sizes to fit required application
- Designed for quick and secure installation
- Minimum maintenance required

APPLICATION

- Construction site
- Industrial safety
- Heavy engineering
- Sports & Recreation

CERTIFICATE

IS 11057:1984

CM/L: 7100121277
