

Saviour T-110 Safety Belt With Double Lanyard With Polyamide Scaffold Hook & Shock Absorber

Model No.: FPSAV-T110-DPSHSA

Saviour Full Body Harness T-110

Saviour offers certified harnesses compliant with European standards, ensuring international quality and comfort. Our range includes harnesses for restraint, fall arrest, work positioning, suspension, and rescue purposes. We provide a comprehensive selection of full body harnesses, lanyards, and connectors tailored to various height-related tasks. Designed to prioritize user safety and comfort, our full body harnesses ensure peace of mind when working at elevated heights.

TECHNICAL SPECIFICATIONS

- The harness undergoes **rigorous corrosion testing**, surpassing 140 hours of salt spray testing. This outlasts conventional harnesses that typically endure only 96 hours.
- It is made with **high tenacity polyester webbing** of 44mm +/-1mm with breaking strength more than 24kn, which contributes to its extended shelf life and prolonged working lifespan, offering exceptional durability.
- Stitching thread is HIGH tenacity NYLON thread strength more than 0.6n / Tex.
- All metal components come with ANTI-RUST THERAPY Coating for long use and enhanced life.
- Each harness is **uniquely numbered** for traceability and undergoes meticulous quality control, ensuring the highest standards are met.
- The harness is **resistant to fading** in bright sunlight, maintaining its integrity even in harsh environmental conditions.
- It is **universally fitting**, accommodating all sizes, making it a versatile choice for various users.
- Each harness is **individually packaged** for convenience, facilitating easy distribution and storage.

| KEY HIGHLIGHTS | APPLICATION |
|--|--|
| <ul style="list-style-type: none"> Full body adjustable harness comes in bright dual-color scheme that facilitates easy differentiation between shoulder and thigh straps. Polyamide webbing ensures excellent resistance to UV rays, chemicals, and abrasion. Individual adjustment of each shoulder strap allows for personalized fitting, with adjustments made via the leg straps. Brightly coloured, high-visibility webbing enhances safety by enabling easy equipment inspection from ground level. Thoughtfully designed shoulder strap adjustment retains surplus webbing to prevent snagging or obstruction during operation. Each product is clearly labelled with part number, description, and date of manufacture for easy identification and tracking. One Dorsal attachment rescue "D RING". The harness has adjustable thigh straps. The adjustable metallic shoulder Points come with a LOCK. All fittings are made of metal (no plastic). | <ul style="list-style-type: none"> Marine, industrial, or coastal settings Industries such as construction, climbing, rescue operations, and any profession requiring fall protection Outdoor activities such as rock climbing, mountaineering, and zip-lining. |
